DOWNTIME INTELLIGENCE™

Downtime is often associated with just equipment failures, however any unplanned event that causes your line to stop is downtime and knowing the exact reasons in real-time is key to keeping the line producing.

Industrial Intelligence has created a way to help you determine your TRUE downtime and make sure you fully understand WHY giving you actionable intelligence to increase productivity.

1

ASSESSMENT
Facility assessment to determine exactly how to capture downtime.

2

IMPLEMENTATION
Full, turnkey implementation that connects to all your equipment and lines giving you real-time visibility.

3

CLOSING THE LOOP
Training to show you how to turn findings into increased uptime.

OUR END-TO-END DOWNTIME SOLUTION INCREASES PRODUCTIVITY AND PROFITS

MANUFACTURING DOWNTIME SIMPLIFIED

Trying to figure out how to track true downtime can be a time consuming and confusing task. Manual entry of downtime can also be extreemly inaccurate. Downtime is one of the main factors that effects your OEE (Overall Equipment Efficiency). By knowing your real downtime and knowing it NOW you can quickly act and improve your overall OEE.

Our turnkey, simple to install solution allows you to fully connect your facility, giving you complete visibility into all of your lines from anywhere.
